OLUEBUBE ANEKE SAMUEL

+2347036616087 | deintellectro247@gmail.com | Enugu, Enugu State 400001

Date of Birth: 07/03/2003 | **Nationality:** Nigerian

PROFESSIONAL SUMMARY

Skilled Software Engineer with strong foundation in complex problem-solving, algorithm optimization, and system architecture. Expert in multiple programming languages and development frameworks, with focus on creating innovative solutions.

EXPERIENCE

Lead Engineer, Divine Consent International[DCI], November 2022 - 2023
Enugu State, Nigeria. [Contract]

- Developed, maintained, and shipped production code for this project, with HTML, CSS, Sass, JavaScript, and jQuery.
- Conducted quality assurance tests to verify cross-browser compatibility and ensure optimal mobile reponsiveness
- Integrated third-party APIs into existing applications via JSON protocols.
- Researched emerging technologies related to backend development best practices.
- Optimized database queries for improved performance through indexing techniques and query refactoring.
- Analyzed complex business requirements to develop innovative solutions using object-oriented design patterns.

Frontend Engineer, ASHEMAFU Health-Focused Digital Platform, Feb 2023 - March 2023
Anambra State, Nigeria. [Contract]

- Designed and enhanced key features of the ASHEFAMU health-focused digital platform using React.js, Redux, Redux Toolkit, and Chakra UI.
- Optimized window scaling and pixel quality to enhance image brightness while reducing loading time
- Integrated third-party APIs into existing applications via JSON protocols.
- Ensured website compatibility across all browsers while maintaining responsiveness on all devices.
- Developed a well-explained README.md to make it easier for any new DEV to understand the smooth flow of the project.
- Maintained the DX of the project, for easy readability and debugging.

Lead Engineer, Duafloxattorneyslp [DAlp], June 2023 - Present, Nigeria. [Contract]

- Structure responsive and accessible UIs using HTML, CSS, and JavaScript.
- Ensure front-end logic integrates seamlessly with server-side components.
- Configure and maintain PHPMailer for reliable, secure delivery of sensitive communications (e.g., case updates, appointment notices).
- Implement fail-safes for delivery errors, encryption for message content, and secure access controls.
- Implement data protection measures (input validation, secure sessions, CSRF protection).
- Align system design with legal frameworks like data privacy laws (e.g., GDPR, local regulations).
- Develop and maintain robust server-side logic using object-oriented PHP.
- Design APIs and internal tools to support legal operations and human services.

Lead Engineer, Legal Crest And Associates, July 2023 - Present, Nigeria. [Contract]

- Refactored and extended a pre-existing project architecture, incorporating advanced UI improvements and implementing robust security enhancement.
- Configure and maintain PHPMailer for reliable, secure delivery of sensitive communications.
- Implement data protection measures (input validation, secure sessions, CSRF protection).
- Develop and maintain robust server-side logic using object-oriented PHP.

EDUCATION

Advanced Web Development
Aptech Education Center, FEB 2023 - JUNE 2023

SKILLS

- Problem-Solving
- API Design and Development
- Understanding of serverless architecture
- Software Deployment
- GitHub collaboration
- Project Management
- Amazon Web Services
- Object-Oriented Programming
- Knowledge of web sockets
- Version control systems expertise
- Software Development Tools: JIRA, Confluence
- Code reviews

TECH STACKS & TOOLS

Languages

Javascript, Typescript, HTML, PHP, NodeJs, XML, SQL

Frameworks

ReactJs, Tailwind, ChakraUI, MUI, Redux-toolkit, VueJs, Vuetify, Pinia, Vuex, NuxtJs, NextJs, Astro, Alpine, Laravel, NestJs, ExpressJs, NueJs, Ionic, Flutter

Tools

Github, Heroku, Git, Postman, RapidApi, Netlify, Vercel, Docker, Firebase, Webpack, Figma, Storybook

LANGUAGES

- IGBO - Native
- ENGLISH - Fluent
